

Javier González Casares

Cyber Threat Intelligence & Malware Analyst • Penetration Tester • OSCP Candidate

Córdoba, Spain | +34 652 601 501 | javiergc100@protonmail.com
i12gocaj.github.io/portfolio | github.com/i12gocaj | linkedin.com/in/javier-gonzalez-casares

PROFESSIONAL SUMMARY

Computer Engineer focused on **cyber threat intelligence**, **threat hunting**, **malware analysis**, **DFIR** and **offensive security**. **OSCP candidate** (Dec 2026). Internships at **AllPentesting** (DFIR & CTI), **Indra Group** (OT Security) and **Navantia** (defence). Active collaborator with the **Spanish National Police** on cybercrime investigations. Member of the **Caliphal Hounds** CTF team, **ranked #2 in Spain (2024)** on CTFTIME, and **\$1,000 Meta Bug Bounty** researcher. Recognized by **NASA's Vulnerability Disclosure Program (2026)** for responsibly reporting a security vulnerability.

CERTIFICATIONS

Offensive Security Certified Professional (OSCP), Offensive Security Expected: Dec 2026

EDUCATION

MSc in Offensive Security <i>Campus Internacional de Ciberseguridad</i>	Oct 2025 Oct 2026 <i>Spain (online)</i>
VIII Expert Diploma: Reverse Engineering & Malware Intelligence <i>University of Málaga (NICS Lab / Google-VirusTotal)</i>	Sep 2026 Dec 2026 (Planned) <i>Málaga, Spain</i>
BSc in Computer Engineering, Specialisation in Computing <i>Escuela Politécnica Superior de Córdoba, Universidad de Córdoba</i>	Sep 2021 Sep 2025 <i>Córdoba, Spain</i>
Erasmus Exchange, Computer Engineering <i>Gheorghe Asachi Technical University of Iasi</i>	Sep 2024 Jun 2025 <i>Iasi, Romania</i>

PROFESSIONAL EXPERIENCE

Digital Forensics Analyst & Cyber Threat Intelligence Intern <i>AllPentesting</i>	Jan 2026 May 2026 <i>Córdoba, Spain</i>
- Supported cybercrime investigations with OSINT, intelligence analysis and tracing of fraudulent infrastructures across surface, deep and dark web (phishing, fraud, malicious APK campaigns). - Ran forensic acquisition, log review and technical reporting on mobile devices, computers and storage media (FTK Imager, Autopsy, Volatility, Nirsoft, Proxmox3). - Reverse-engineered Android APKs; reviewed logs from VPN, RDP, NAS, Microsoft 365 and OneDrive for malware triage, IoC identification and TTP attribution. - Built n8n automations and internal tooling for security audits, threat simulation and phishing analysis. Deployed ATAK-CIV / TAK Server environments for tactical coordination with law-enforcement teams.	
OT Security Engineer Intern <i>Deuser (Indra Group)</i>	Nov 2025 Dec 2025 <i>Córdoba, Spain</i>
- Designed industrial network diagrams for OT (Operational Technology) environments: device mapping, segmentation and trust zones. - Deployed and configured Microsoft Hyper-V virtual machines for internal labs and test scenarios. - Completed firewall configuration training and hands-on laboratory work with Siemens PLCs (industrial control systems).	
Cybersecurity Engineer Intern, COEX Naval Systems <i>Navantia, S.A., S.M.E. (Defence Sector)</i>	Jun 2025 Sep 2025 <i>San Fernando, Spain</i>
- Designed and deployed the centre's monitoring and defence infrastructure (SIEM, IDS and router/firewall integration). - Built a network testing laboratory for the passive combat systems of naval vessels. - Delivered cybersecurity training sessions to colleagues across the department. - Automated repetitive operational processes to improve efficiency and traceability.	
Cybercrime Investigations Collaborator <i>Spanish National Police (Policía Nacional)</i>	Jun 2025 Present <i>Remote, Spain</i>
Provide OSINT and technical analysis for active investigations into web-based scams and online fraud targeting Spanish citizens.	

- Document findings in case-ready evidence packages, applying chain-of-custody and operational discretion.

NOTABLE PROJECTS & SECURITY RESEARCH

- **Instagram Notes Audio Leakage via URL Extraction** (Meta Bug Bounty, May 2025): privacy bypass exposing background audio of Instagram Notes through direct video URL extraction. **Awarded \$1,000** bounty; validated and patched. github.com/i12gocaj/Instagram-Notes-Audio-Leakage-via-URL-Extraction-Fixed
- **Instagram Password Change Bypass** (Meta Bug Bounty, Apr 2025): account-takeover vulnerability allowing password change without knowing the current one. Responsibly disclosed; silently patched. github.com/i12gocaj/instagram-password-bypass
- **Client-Side Time Manipulation in Club Gym Sierra** (patched in v4.4.19): logical vulnerability enabling unfair early class booking by manipulating the device clock. github.com/i12gocaj/club-gym-sierra-time-bypass
- **Directional Prediction of Financial Assets with Machine Learning** (BSc Thesis, 2025): pipeline that mixes technical indicators, ML baselines (scikit-learn, XGBoost), deep learning (TensorFlow) and GDELT news-sentiment data to predict price direction of BTC-USD, TSLA and NVDA. github.com/i12gocaj/tfg-prediccion-direccional-activos-financieros
- **SecEmail** (open source, 2026): SPF/DKIM/DMARC/ARC auditor and authorised SMTP/phishing simulator for Red Team engagements. Cryptographic DKIM verification, IDN homograph detection, MTA-STS/TLS-RPT/DANE/BIMI checks and campaign dashboard with tracking and credential capture (~5k LOC of Python, 167 tests). github.com/i12gocaj/SecEmail

ACHIEVEMENTS & RECOGNITIONS

- **NASA Vulnerability Disclosure Program (VDP) Recognition** (Jun 2026): Letter of Recognition from NASA's Office of the Chief Information Officer (SAISO) for identifying and responsibly reporting a security vulnerability in NASA systems, following NASA's VDP policy and guidelines.
- **Caliphal Hounds CTF Team (2024)**: team **ranked #2 in Spain** on CTFTIME.
- **1st Prize**, Hackademics Forum III CTF.
- **Best Device Award**, 4th Biotechnological Hackathon (IMIBIC & EPSC, Apr 2026): challenge "Intelligent counting device for post-surgery surgical material".
- **Week 4 Winner**, "El Bug de la Semana" (INCIBE & IMMUNE, 2025).

TECHNICAL SKILLS

Threat Intelligence & OSINT: MITRE ATT&CK, threat hunting, threat actor profiling, IoC analysis, surface/deep/dark web investigation, Maltego, Shodan, VirusTotal.

Malware Analysis & Reverse Engineering: static and dynamic analysis, Ghidra, IDA Free, x64dbg, YARA, Android APK analysis.

Digital Forensics & DFIR: memory, disk and network forensics; FTK Imager, Autopsy, Volatility, Wireshark, Nirsoft, Proxmark3, mobile and storage media forensics, log correlation, chain-of-custody.

Offensive Security: Burp Suite, Metasploit, Nmap, Nessus, Tenable, BloodHound, Impacket, privilege escalation, lateral movement, OWASP Top 10, Hack The Box, TryHackMe.

OT/ICS & Infrastructure: industrial network design, Siemens PLCs, firewall configuration, Microsoft Hyper-V virtualisation.

Automation & Tooling: n8n workflow automation, Python scripting for analysis and evidence generation, ATAK-CIV / TAK Server deployment.

Programming: Python, Bash, C, C++.

Databases: MySQL, MongoDB, MariaDB.

Operating Systems: Linux (Kali, Parrot, Ubuntu), Windows, Active Directory environments.

EXTRACURRICULAR ACTIVITIES

Cybersecurity & Free Software Classroom (EPSC, Universidad de Córdoba) Sep 2021 | Sep 2025
Active member of the student-led cybersecurity group: contributed talks, workshops and CTF coaching to peers.

Debate Team (La Salle Córdoba) Sep 2018 | Jun 2021
Two-time champion in inter-school debate competitions; served as debate mentor for younger students.

Scout Movement, Local Youth Group 2008 | Present
Active scout since 2008. Served as **President** of the local youth group (2023-2024), coordinating teams of volunteers and leading community-oriented projects.

LANGUAGES

Spanish: Native • **English**: B2 (Upper-Intermediate)
